

Sofia Brandt

Senior Java Backend Engineer

sofia.brandt@email.example · +49 30 555 0188 · Berlin, Germany

Professional Summary

Senior backend engineer with 9 years primarily in Java/Kotlin microservices and enterprise integrations. Limited Python exposure and no hands-on machine learning or LLM experience. Strong systems design and leadership skills in traditional backend domains.

Experience

Senior Backend Engineer — EuroPay Technologies (2019 – Present)

- Architected payment orchestration microservices in Java 17 / Spring Boot handling 50k TPS peak.
- Led team of 6 engineers; defined SLIs/SLOs and incident response.
- Migrated legacy monolith modules to Kubernetes on AWS EKS.

Backend Engineer — LogiChain GmbH (2015 – 2019)

- Built REST and event-driven services (Kafka) for supply-chain tracking.
- Implemented integration tests with Testcontainers and CI on Jenkins.

Junior Java Developer — NordSoft Consulting (2013 – 2015)

- Developed CRUD modules and SOAP connectors for enterprise clients.

Skills

Java, Kotlin, Spring Boot, Kafka, Kubernetes, AWS, PostgreSQL, gRPC, Jenkins, limited Python scripting, no ML frameworks

Education

- Dipl.-Inform. (M.S. equivalent) — TU Berlin, 2013

Projects & Portfolio

- Internal JVM performance workshops; open-source contributions to Java testing libraries — no AI/ML portfolio.
